Huron County Board of DD Strategic Plan

Introduction

In late 2014, after completing the prior strategic plan, the HCBDD board and leadership determined the need to develop a new strategic plan to guide the organization into a changing future.

Phase one of the planning process was an assessment to provide a comprehensive evaluation of what HCBDD is doing and to provide insight into what HCBDD should focus on in the future. To gain this understanding as objectively and thoroughly as possible, I completed the following activities:

- Analysis of financial trends.
- Analysis of service delivery trends.
- Focus groups with persons served to understand satisfaction and wishes.
- Focus groups with parents to understand satisfaction, wishes for their family member, perceived agency strengths, concerns, and expectations.
- Focus groups with staff members in all departments to understand recent trends, strengths, opportunities for improvement, and needed accomplishments.
- Focus group with providers to understand their perception of the board's strengths, weaknesses, and needed accomplishments.
- Focus group with members of organizations and agencies that work with and support HCBDD to understand their perception of recent trends and of the Board's strengths, weaknesses, and needed accomplishments.
- Written surveys for persons served, providers, and family members.
- Meetings with current employers of people served by HCBDD.
- Opportunity for board members and management team members to envision an ideal future.
- Review of past three years of board minutes.
- Evaluation of recent changes at the state and federal level and identification of needed changes.

Future Vision

This vision of the future was developed from ideas expressed by board, staff, persons served, family members, providers, and partners. This narrative represents the long term vision that the organization is working toward. **Read this as though you are in the year 2025.**

The Huron County Board of Developmental Disabilities embraced the changes mandated in 2014. They fully achieved Conflict Free Case Management by the end of 2016, and developed strong, collaborative relationships with the providers that are serving individuals in Huron County. As a result, the providers and the service options today meet the unique needs of every individual.

HCBDD continues to embrace its role as the case manager for services to persons of all ages with DD. Person-centered planning focuses on helping each individual maximize his or her abilities which has resulted in increased independence for all receiving HCBDD supports. HCBDD now provides early childhood services to children through the age of five, ensuring the best foundation for the youngest children.

Christie Lane School is a valued part of the educational services within Huron County. HCBDD has collaborative relationships with the public schools in the county, and has worked with the schools (including Christie Lane) to improve the transition education. As a result, students today are graduating with a much better preparation for community employment.

The non-work recreational and social activities remain an important part of the lives of persons with DD in Huron County. HCBDD provides some recreation services and partners with its network of providers to ensure a comprehensive set of recreation and social activities. Artists' Open Studio continues to provide

Huron County Board of DD Strategic Plan

creative outlets for individuals supported by HCBDD. The studio gradually reduced its dependence on HCBDD and is now a private provider.

HCBDD and its providers have strengthened their ability to provide competitive work opportunities, and successfully transitioned from a workshop and activity services model to an integrated employment and service model early in the strategic plan cycle. Providers of services to adults have increased their employment services and share the goal with HCBDD to enable every person desiring employment to succeed in working competitively. Employment outcomes have increased over 2015 in every measure: the number employed competitively, the number of hours worked, the average wage earned, the number with employer provided benefits, and the number of employer partners.

In collaboration with schools, providers, and community partners, HCBDD strives to achieve:

Children ready to learn

Children succeed in school

Youth successfully transition to adulthood

Job seekers find meaningful work

Individuals contribute to their own support

Individuals thrive in the Huron County community

Individuals supported by Huron County Board of DD truly fulfill the mission: they contribute to the community and achieve the life they want. Huron County residents with DD are accepted for their unique gifts and are valued for their contribution to the overall quality of life for the entire community.

Self-advocacy is an essential skill that is taught in school and is supported by HCBDD in adults. Self advocates are active contributors to board meetings, participate in defining services, and assist in identifying future needs.

Staff members successfully navigated the operational changes caused by the 2014 defined system changes. They remain motivated and committed to helping persons with developmental disabilities achieve all they can. They strive to find teachable moments that help someone learn and develop a new capability or talent. HCBDD maintains its ability to have outstanding board members who bring diverse skills, passion for improving the lives of people with DD, and connections throughout Huron County.

HCBDD assesses and improves its operations on a continuous basis, involving staff members at all levels in making the assessments and suggesting needed improvements. Every department makes the time to bring staff together to identify strengths, concerns, and possible improvements. All staff in-service days include time for shared reflection and brainstorming across the agency.

Staff members, board members, and providers work collaboratively and passionately to achieve this vision of the future.
